## Apple Mac - Direct to ONT PPPoE Connection

Step 1 & 2 -

First connect your Mac directly to the network port on your ONT with an Ethernet cable.

Then on your Mac -Open System Preferences

(Click the Apple icon in top left corner)

Then select 'Network'.

Step 3 & 4 -

Click the plus and select PPPoE.

Give the connection a suitable name such as 'PPPoE' or 'TEST'

Select the interface and enter a name for the new service.				
Interface:	PPPoE			
Ethernet:	Ethernet		$\bigcirc$	
Service Name:	PPPoE			
		Cancel	Create	

Step 5 & 6 -

Enter your Aquiss Internet connection details,

(abb-yourdetails@aquiss.com + password)

Click on Apply then click on Connect.

You should then be able to connect to the internet and perform any required tests.

PPPo	E Service Name:	Provided by ISP when required
